For Immediate Release
January 2007

Schedulesurgery.com, a division of Focal Point Health, LLC, announces the release of the Surgery Center Online Resource (SCOR™), a revolutionary web-based scheduling request and information exchange tool.

Initially, created as a custom application for an Ambulatory Surgery Center in 2004, SCOR™ provides productivity and efficiency benefits to the ambulatory case scheduling and patient registration processes. Now available nationwide, SCOR™ works as a simple, HIPAA compliant, low cost addition to a facility's existing scheduling system, which allows the facility to maintain complete control of its schedule removing the bottlenecks inherent in traditional case scheduling communication mediums.

In the era of internet and e-commerce, Ambulatory Surgery Facilities now have a superior alternative to phone and fax based scheduling. They can now utilize the power of the Web for case scheduling and rich improved communications with physician offices and patients. SCOR™ enabled facilities see an immediate improvement in operations, marketing opportunities and client customer service. SCOR™ creates an always open

front door to the facility, by providing a superior scheduling and communications medium.

Set up and training on SCOR™ is quick and easy, usually taking less than four hours. Physicians, anesthesiologists and facility staff find the conveniences afforded by SCOR™, such as checking facility schedules or making appointment requests remotely, even after hours, reduces scheduling miscues and maximizes scheduling efficiency, creating a high return on investment. Schedulesurgery.com and its parent company, Focal Point Health, LLC are based in Columbus, Ohio. FPH has been providing information management products and services to ambulatory surgery facilities since 2001. In addition to SCOR™, FPH performs consulting, data integration and reporting services, specifically for the outpatient industry.
